-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, filed 8-30-06, with respect to the rejection(s) of claim(s) 1-4 and 10 under 102 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Causley et al (US Patent 4,818,285).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Causley et al (US Patent 4,818,285).

Causley et al teach an ink composition comprising a liquid diluent system comprises about from 30 to 100 percent of an aqueous solvent, from about 0 to 70 percent of a water-soluble organic solvent, from about 0 to 0.5 percent of the chelating agent, from about 0 to 1.0 percent of the biocide and dye (col. 3 lines 6-55). In the example Ink No. 2, the reference discloses Reactive Red 40 (non-fluorescent colorant) and Acid Red 52 (fluorescent colorant), which differ in spectral reflectance. The composition as taught by Causley et al appears to anticipate the claimed invention.

Claims 3-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Causley et al (US Patent 4,818,285).

Causley et al is described above, but fails to specifically exemplify the formulas set forth in claims 3 and 4 as claimed by applicant.

Causley et al and the claims differ in Causley et al (US Patent 4,818,285) does not teach the exact same proportions as recited in the instant claims.

However, one of ordinary skill in the art at the time the invention was made would have considered the invention to have been obvious because the compositional proportions taught by Causley et al overlap the instantly claimed proportions and therefore are considered to establish a prima facie case of obviousness. It would have been obvious to one of ordinary skill in the art to select any portion of the disclosed ranges including the instantly claimed ranges from the ranges disclosed in the prior art reference, particularly in view of the fact that;

"The normal desire of scientists or artisans to improve upon what is already generally known provides the motivation to determine where in a disclosed set of percentage ranges is the optimum combination of percentages", In re Peterson 65 USPQ2d 1379 (CAFC 2003).

Also, In re Geisler 43 USPQ2d 1365 (Fed. Cir. 1997); In re Woodruff, 16 USPQ2d 1934 (CCPA 1976); In re Malagari, 182 USPQ 549, 553 (CCPA 1974) and MPEP 2144.05, absence evidence to the contrary.
